The Approach

How did you find S.C. Enlivy S.R.L.?

Codeable

How many teammates from S.C. Enlivy S.R.L. were assigned to this project?

1 Employee

Describe the scope of work in detail. Please include a summary of key deliverables.

We had a customer that wanted a customized solution for Wordpress. We hired them to develop this customization for us as subcontractors. The customization was related to Wordpress/ Woocommerce and AfiliateWP. It required a deep understanding as it was tricky to implement.

The customization was related to registration and custom invite codes that were generated by Affiliate WP. The codes were associated to a specific affiliate, hence they were awarded a commission if there was a purchase. The idea was that this had to be invite only website+affiliate related functionality. We communicated with Robert and his communication skills were incredible.

The Outcome

What were the measurable outcomes from the project that demonstrate progress or success?

We had clear requirements set by our team; they fulfilled all of them. At the end we had working solution that is working even today.

Describe their project management. Did they deliver items on time? How did they respond to your needs?

All the items were delivered ontime and everything was with very good quality and properly tested. We found some bugs which they fixed promptly.

What did you find most impressive or unique about this company?

The fast response and the quality communication. He (Robert) clearly understood the tasks and was able to get most out of the requirements. He even advised us on some topics, which we implemented.

Are there any areas for improvement or something S.C. Enlivity S.R.L. could have done differently?

I am not sure that i can provide an answer here because our task was with clear requirements and the level of satisfaction from us was good. I think i will be able to assess if there are any areas of improvement if we work on bigger projects.
